Q2:

```
abstract class shape {
    abstract void draw();
    void.
    public String get color() {
        return this.color;
    }
}

class rectangle extends shape {
@override
    void draw() {
        System.out.println("ve"); }
    String get color() {
        return this.color;
    }
}

class circle extends shape {
@override
    void draw() {
        System.out.println("ve");
    }
    String set color() {
        return this.color;
    }
}
```

```
class ~~main~~ shape App {
    public static void main (String[] args);
        shape r1 = new rectangle;
        shape c1 = new circle;
        r1. draw();
        c1. draw();
```
