```
interface Mail {
    void method Mail();
    void method log();
}

class Mail mpl implements Mail {
@override
    public void method Mail() {
        System.out.println("mail");
    }

    ~~public void~~
@override
    public void method log() {
        System.out.println("log");
    }
}

class main {
    public static void main(String[] args) {
        Mail m1 = new Mail;
        m1.method Mail();
        m1.method log();
    }
}
```
