Bài 4:

```
Class car {
Protect String color;
Protect double speed;
Private void accelerate() {
    System.out.println("...");
}
Public String get Color() {
    return this.color;
}
Public ~~String~~ double get Speed() {
    return this.speed;
}
}
```

Date:

```
Class BMW extends Car {
  Public
@override
public void accelerate () {
  System.out.println(" ");
}
Public String to String () {
  System.out.println(" ");
}
}

Class Civic extends Car {
  @override
  public void accelerate () {
    System.out.println(" ");
  }
  Public String to String () {
    System.out.println(" ");
  }
}

Class main {
  Public static void main (String [] args) {
    Car B1 = new BMW ();
    B1. new accelerate ();
    Car C1 = new Civic ();
    C1. new accelerate;
}
```
